File Names	Tip Size	Tapper	Size Color Ring	Stopper Color	Active Part Length	File's Length	Torque N/cm	Speed (rpm)	File Tip
Smart Path	0.10	0.03	Narrow Purple Ring	Purple	16mm	21, 25, 31	1.2 - 1.5	400-450	Non-Cutting Tip
Smart Path	0.13	0.03	Wide Purple Ring	Purple	16mm	21, 25, 31	1.2 - 1.5	400-450	Non-Cutting Tip
Smart Path	0.15	0.03	Narrow White Ring	White	16mm	21, 25, 31	1.2 - 1.5	400-450	Non-Cutting Tip

- Three sterile NiTi files in one pack that ease dealing with extremely curved root canals.
- The non-cutting tip allows the file to excellently follow the original path of root canals which minimizes ledges formation or canals transportations.
- The innovative files design, unique tips sizes (10, 13, and 15) and the 0.03mm taper, gives Smart Path files excellent flexibility that allows more predictable negotiation and glide-path preparation of severely curved canals with great centering ability.

- The special GOLD Heat Treatment, and the electrochemical polishing of the instruments' surface, significantly increase resistance to both fatigue and fracture especially in extremely curved canals.
- Files are available in three different lengths (21, 25 and 31mm) to meet clinicians needs and preferences according to each case
